

Klamath National Forest Pollinator Nature Hike

Grouse Gap Shelter, Siskiyou Crest

9:00 am

July 20, 2013

You are invited to join botanists and biologists for an interesting day learning about local avian and insect species that play an important role in pollination. In celebration of National Pollination Week, the Klamath National Forest will sponsor a day hike to observe pollinators that occur in our mountains. The day will involve a short hike observing hummingbirds, butterflies, bees and native plants that occur in high elevation meadows of the Siskiyou Crest. The day will include discussions on pollinator life histories, the state of pollinators in our area, and things that you can do to help conserve these important species.

Meet at the Mt. Ashland Ski Park parking area at 9:00 am, Saturday, July 20, 2013. From there the group will carpool to the Grouse Gap Shelter on the Siskiyou Crest. The day will begin with a presentation and then a short hike will start from there. Wear light hiking boots; bring binoculars, cameras, water, and plenty of snacks.

For more information please contact Danika Carlson or Sam Cuenca at the Salmon /Scott River Ranger District at 530-468-5351.
